Nami Series 2

Double Curve Series 23

## Fluid Wood

The Fluid Wood Collection was born with the idea of working with wood in a *free* and *organic* way. Making it **light**, **flexible** and **beautiful**. All pieces are part of an exclusive collection and are entirely handmade. Furniture wood sculptures.

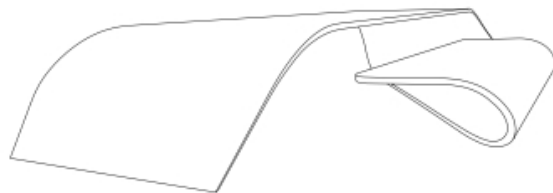

# Fluid Wood

## Nami Series

Inspired by the natural curvature of wood shavings, the designer created a series of sculptural tables, all bent three-dimensionally in one continuous loop. 10 single layers of wood of 8 m length each are bent three-dimensionally.

An organic and continuous FLOW OF WOOD that evokes the essential ELEGANCE and the natural form of the wood shavings. A GEOMETRIC GAME that recreates a NATURAL SHAPE and that develops itself in three different concepts of ORGANIC TABLES.

Three unique pieces, each one designed in relation to a specific use. Three different shapes that suggest the purpose.

# SERIES

Conceived as **Made in Italy** products and as large scale **wood sculptures**.

Realized using a **bending wood technique** that allows the wood surface to flow like a wave, from the bench seat to the table top.

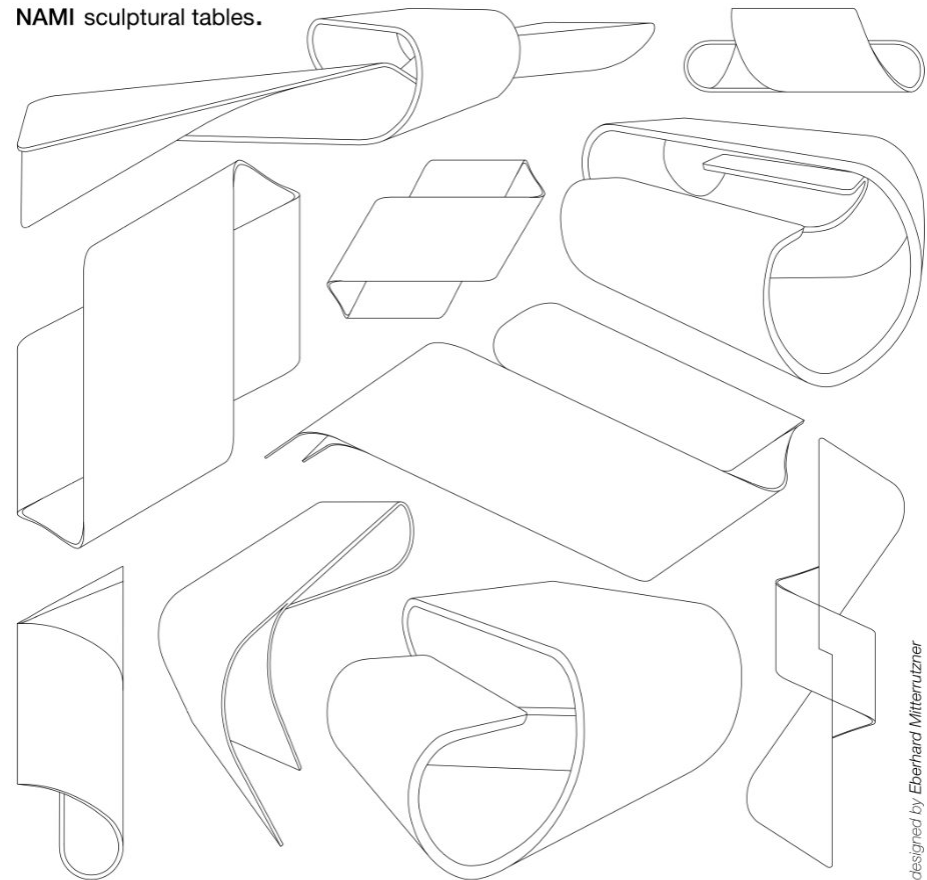

Nature played a main role in the design process, since we can find there many forms of soft and continuous curvatures - like in the ocean waves.

The design sculptures are suitable for exclusive office space, apartment lofts, hotel receptions, bank lobbies and other locations in need of refined character and distinction.

NAMI offer a supreme tactile and visual experience, adding value to every space; showcasing our appreciation for precision in craftsmanship and ambition for cutting-edge solutions.

## Nami Series

NAMI sculptural tables.

## Double Curve Series

The result of our burning desire to make **wood light, strong and flexible**, is a piece of furniture made out of double curved ash shells.

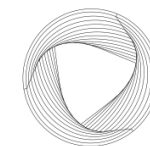

Our artisan process allows a **double bend** of the wood by gluing together horizontal veneer slices in several steps and using a specific geometric correction method.

A great writer once wrote that only the impossible is worth doing. We think that only the impossible is necessary.
